

Apprise[®] ERP for Wineries

Apprise ERP for Wineries is designed to help you manage and track your wine operation, from the production process through your supply chain. With integrated winery and ERP software features, our solution will help you increase efficiencies, reduce costs and maximize profitability.

The Challenge

Finding a software solution that can help you manage both your winery and supply chain processes. Wineries have unique and complex needs. Blend composition tracking, compliance requirements, wine clubs, inventory, distribution, these are all critical areas that have to be managed as efficiently as possible. Doing so not only makes your business run better, it actually adds revenue.

The Solution

Designed to help you manage your winery's operation and supply chain, Apprise has teamed up with Wine Management Systems (WMS) to launch an end-to-end solution with features typically reserved for the large, national wineries. The result is a fully-integrated solution that will help your business with keeping costs down, compliance requirements, better data security and reporting, and easier maintenance.

Through this partnership, you'll gain total visibility into your production, wine clubs, accounting, inventory and logistics data, allowing you to run your operations more efficiently, and build a better business. With real-time data, mobile accessibility, business intelligence tools and customizable reporting, you'll always have the information needed to make better business decisions faster. One source, one solution.

Positioned to help you achieve more

With our focus on ERP and SCM solutions for wineries, wine importers and distributors, our team understands the unique challenges of your business.

Specialized vertical, or industry-specific software like ours requires less customization, resulting in a faster ROI and a less expensive implementation.

Our fully-integrated solution reduces the need for separate bolt-on systems, resulting in keeping costs down, better data security & reporting, and complete supply chain visibility.

With offices in the U.S., Europe, Asia and Australia, we do business where you do business — with support available 24 hours.

Production

- > Lot history from weigh tag to bottling
- > Work order generation and printing
- > Barrel tracking
- > Blend composition tracking
- > Laboratory analysis history
- > Integration with ETS Labs
- > TTB compliant — generate 5120 reports automatically
- > FDA compliant — lot tracking of additives and bottling supplies

Wine Club

- > Create, manage and fulfill for multiple clubs
- > Full integration with Intuit® Merchant Services for QuickBooks®
- > Customer database and mailing list management
- > Email communication & marketing capabilities
- > Interfaces with UPS Worldship® and FedEx®
- > State compliance reporting — including sales & excise taxes

Inventory & Distribution

- > Full warehouse and inventory tracking
- > Transportation & logistics management
- > Demand planning & purchasing
- > Control state compliance reporting
- > BDN/VIP reporting and EDI
- > Sophisticated pricing management
- > Financials, billbacks & sales tracking
- > Reservation/depletion management
- > Business intelligence tools
- > Mobile apps for on-the-go sales ordering

Benefits

- > An end-to-end solution means more operational efficiencies and cost savings
- > Cloud-based technology allows for cost-efficient and secure data storage
- > Detailed reporting capabilities help you meet TTB, FDA and control state compliance requirements
- > Real-time inventory and data records help improve customer relations and increase sales
- > Mobile solutions enable anytime, anywhere access, and more sales opportunities
- > Forecasting and planning tools ensure product availability is aligned with demand
- > Wine Club management tools broaden your customer base and increase sales
- > Automated scheduling and pick demand generation improves route management
- > Container tracking and landed cost management tools help you control distribution expenses
- > Business intelligence tools enable faster, better-informed business decisions

Apprise and Wine Management Systems (WMS) are focused on solving the unique challenges of wineries. With industry-specific experience that combines production, wine club and supply chain management, our partnership and solution will enable you to run a better business.
