

EDI Solutions

Apprise® EDI solutions enable you to interact with your trading partners seamlessly and in real-time to help you increase revenues and reduce costs by meeting mass merchant compliance requirements. Our solutions fully integrate with your enterprise system for streamlined transactions, improved collaboration and better trading partner relationships.

Operational efficiencies

Fully integrated EDI software streamlines EDI transaction processing between you and your trading partners, and provides ongoing real-time access to EDI transaction data and history. Professional services and outsourcing options, such as EDI map creation and management, offer the resources and expertise you need to quickly meet current and evolving trading partner compliance requirements – without the need for costly training or extra personnel. Data import and export functionality enables data integration between Apprise® ERP and third-party EDI software solutions.

Increased profitability

Support for EDI transactions that are required by trading partners results in improved compliance – leading to increased sales opportunities and reduced chargebacks. Electronic transactions save time and improve data accuracy – decreasing error rates and reducing personnel time lost to investigating and resolving error issues. Faster and more accurate transaction processing decreases inventory-on-hand requirements and associated inventory carrying costs. Improved order accuracy drives shorter billing cycles and improvements in days-sales-outstanding. Insight into business processes and performance helps identify areas for ongoing operational improvements.

Improved customer relationships

Faster, more streamlined interactions among trading partners foster collaboration and the sharing of information throughout the supply chain. Leverage expert services and ongoing support to quickly and easily establish and maintain trading partner compliant EDI solutions. Meet varied customer requirements with support for ASC X12 and EDIINT/AS2 standards. Gain a competitive edge through improved demand forecasting accuracy, reduced inventory costs and improved time-to-market. Increase customer satisfaction through reduced order errors, improved product availability and faster delivery response times.

Three flexible options deliver the tools and capabilities you need to comply with retailer mandates and improve your ease-of-use and integration.

Apprise® EDI Transaction Manager – a single, fully integrated EDI solution

- > Eliminates the need for third-party EDI software
- > Supports ASC X12 and UCS standards
- > Provides flexible communication options
- > Seamlessly maps EDI data to your core Apprise® ERP application database fields
- > Provides advanced scheduling to ensure transactions are sent/received in a timely manner
- > Archives EDI transactions for data storage, retrieval and inquiry
- > Create your own EDI maps based on individual trading partner requirements with our user friendly map creation tools. Our modern graphical user interface and drag-and-drop tools enable users to create maps quickly and accurately.

Apprise® EDI Trade Services – our expert EDI mapping services

- > Support for EDI transaction compliance
- > EDI map creation to the specifications of each of your trading partners
- > Ongoing map management to accommodate trading partner changes and ensure ongoing compliance
- > Day-to-day transaction monitoring to identify and resolve issues and ensure smooth operations with your trading partners

Apprise® EDI Gateway – integrates with your third-party EDI software solution

- > Enables you to leverage existing EDI software investments
- > Supports EDI transactions required by trading partners to achieve compliance
- > Seamlessly imports/exports data between your Apprise ERP application and external EDI software
- > Supports ASC X12, EDIINT/AS2 standards

Making your supply chain better, so you can run a better business

Apprise is focused on solving the unique supply chain challenges of consumer goods manufacturers, importers and distributors. With industry-specific ERP software and a global team that understands your business, helping our clients achieve more is what we do best.
